

“Happy Birth Day” – The Obstetric Hire Service from TeNS Medical

Now with a choice of three obstetric TeNS units, a unique “deluxe” service and a “next day” delivery option we believe “**Happy Birth Day**” is the most comprehensive and cost effective professional obstetric TeNS hire service in the UK.

Whichever service you choose your hire now covers a nominal 7 week period – and there are NO extra charges for late returns. If you place your order in time, your package will be sent to a full month before your due date, ready to use the instant labour begins. When you’ve had your baby and no longer have any use for your TeNS we ask you to post it back using a pre paid label. Unlike with some hire services there’s NO deposit and NO hidden extras with “**Happy Birth Day**”.

GEM Labour: Conventional design, twin channel Obstetric TeNS with a hand held control switch for changing between Background and Boost modes.

Following the modern trend this unit offers the facility for changing Frequency, Bandwidth and Operating Mode pretty much as you would expect to see in any good quality TeNS. This makes GEM the ideal choice if you want to use your TeNS to help with back ache or other “normal” pain control.

Whilst it offers you choice GEM is easy to set up. We provide recommended settings for Childbirth, you can change and experiment if you want to do so.

(New for 2006).

Hire charge £23.95 + £2.00 delivery.

GEM Plus: For a small additional cost we’ll provide a pair of our special 200 x 50mm electrodes in addition to the normal set of obstetric electrodes (50 x 100mm). Used at shoulder blade level combined with standard obstetric electrodes used as the bottom pair this upgrade guarantees maximum effectiveness.

Hire Charge £28.90 + £2.00 delivery.

Neurotrac Labour:

This is a traditional designed twin channel Obstetric TeNS unit with a hand held control to switch between Background and Boost Modes.

Neurotrac Labour has just two programmes pre set for Obstetric use. These programmes cannot be altered in any way other than, of course, the intensity. This is therefore a good choice where simplicity is the key issue.

Subject to its limitation of having pre set programmes Neurotrac Labour can be used for normal pain control.

Introduced 2003

Hire charge £23.95 + £2.00 delivery.

Neurotrac Plus: As with GEM we offer our extra large electrodes as an option for maximum effectiveness.

Hire Charge £28.90 + £2.00 delivery.

Freedom: This started life as the hire unit chosen by the UK’s second largest pharmacy chain. Available direct from TMS you can also hire Freedom from any independent Pharmacy. (If they’re not already aware, just get them to call us). Unlike other Obstetric units this is a single channel device using just two electrodes. However these are double the normal size. The unit itself fits comfortably into your hand and you change from background to boost mode (and back) by just touching a sensor pad. A short instructional video is included in every Freedom hire package.

Introduced approx 1998

Hire charge £19.95 + £2.00 delivery.

- Provided you order in advance your unit will be sent by Royal Mail 1st Class Post a full month before your Due Date. All “urgent” orders received before 4.00 pm will be despatched the same day. (Mon – Fri). If it’s already past 4 o’clock we suggest you ring to confirm we can meet today’s post deadline.

- Royal Mail’s “Next Day” service is optional for an additional £4.00. (Operates Mon – Fri)

- The Hire Period is a nominal 7 weeks. We do not charge for extensions to this period but we do ask you to keep us aware if an extension is required. “Lost” units will be charged at their retail value.

- Pre Paid return postage and packaging is included in the price. You simply tape up the box and post it back!
